

I purchased the 1978 Coronado 15 (Made by Catalina) fourteen years ago the first week we arrived in the area from a LMSC member. It was re-gel coated then with the color added.

AZUZU- Demon god of the South wind. It is a great beginner boat as well as an advanced sailor boat. High boom for beginners, trapeze for advanced, dryer than a 420. Older sails but work well. Needs two access ports put in to remount the cam cleats (included) and should be ready to go after that. It has a blue hull, brown mast, and is second closest to the back cove bath house on land parking. Boat includes sails, cover, trailer, and any spares I have. \$1000.
